

Abdelrhman Aboelmagd

Backend Developer (.NET)

✉ abdelrhmanmohamedghazy2000@gmail.com ☎ +201019669374  linkedin  Github  Tanta

PROFILE

Backend Developer (.NET) specializing in building scalable APIs with ASP.NET Core, applying Clean Architecture and CQRS for maintainable systems. Experienced in performance optimization using Redis caching and implementing secure authentication with Identity & JWT. Strong in problem-solving with a proven ability to quickly learn and adapt to new technologies, while following SOLID principles to write clean, testable code.

SKILLS

Language: C#, C++, SQL

Technologies: ASP.NET Core Web API, .NET Framework, ASP.NET Core Identity, JWT, LINQ, Caching (Redis), Asynchronous Programming, Entity Framework Core (EF Core), Windows Forms, ADO.NET, Unit Testing

Database: SQL Server, T-SQL, MySQL

Architecture & Patterns: Clean Architecture, N-Tier Architecture, Specification Pattern, CQRS, Repository & Unit of Work, API Design, OOP Principles, SOLID Principles

Tools: Visual Studio, Git, GitHub, Postman, Swagger

PROJECTS

E-Commerce API

Architecture: Built a scalable backend using Clean Architecture and CQRS (MediatR).

Features: Developed core e-commerce features including product management, order processing, and user authentication workflows.

Performance: Improved response times and reduced DB load using In-Memory & Distributed caching.

Security: Implemented ASP.NET Core Identity & JWT with Refresh Tokens, RBAC, and Policy-Based Authorization.

Data Layer: Managed data with EF, Using Repository & Unit of Work, with FluentValidation for business rules.

Resilience: Ensured stability via Rate Limiting, Audit Logging, and Global Exception Handling.

DVLD Project — Driver Licensing Management Desktop App

Developed a desktop application for managing driver licensing operations using C#, .NET Framework, and Windows Forms. Features include adding, editing, searching, and deleting driver records, handling multiple license types, and issuing/renewing/replacing licenses. Integrated with SQL Server for secure data storage, following a 3-tier architecture to ensure maintainability and scalability.

EDUCATION

Bachelor of Computer Science at Tanta University, Egypt

Expected Graduation: 2028

LANGUAGES

Arabic: Native | **English:** Proficient
